Aman Singh

github.com/aman-singh27 linkedin.com/in/aman-singh amansingh271204@gmail.com

Education

Manipal University Jaipur June 2027 (Expected)
B.Tech in Computer Science Engineering (AI & ML) *GPA: 8.84 / 10*

Manav Rachna International School June 2023
Class XII (Science – PCM) *GPA: 8.88 / 10*

Relevant Coursework

Core Courses: Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Operating Systems, Cloud Computing, Compiler Design, Design & Analysis of Algorithms, Computer Networks, Probability & Statistics, Calculus, Discrete Mathematics, Agile Software Development, Artificial Intelligence & Machine Learning

Skills

Programming Languages: TypeScript, JavaScript, Python, C/C++, SQL, HTML/CSS

Frontend Development: React (TSX), Vite, Tailwind CSS, Component-Based Architecture, Responsive UI Development

Backend & Databases: Firebase (Firestore, Auth, Functions), Supabase, RESTful APIs, Serverless Architectures

AI, Automation & Agents: n8n, Make.com, Relevance AI, LLM Integration (Gemini, Mistral), Prompt Engineering, OCR Pipelines, AI Agent Development

Dev Tools & Design: Git, GitHub, Figma, VS Code, CI/CD Basics

Core Competencies: Full-Stack Development, Workflow Automation, System Design, UI/UX Principles, Problem Solving, Cross-Functional Collaboration, Team Leadership

Projects

MedVault – Emergency Medical Record Access Platform | *React (TSX), Firebase, Supabase, Gemini AI* Dec 2024 – Pre

- Building a secure emergency medical record platform enabling healthcare providers to access critical patient data within seconds during emergencies.
- Implemented authentication, role-based access control, and session handling using Firebase Auth to ensure HIPAA-aligned security practices.
- Designed scalable NoSQL data models and real-time patient record storage using Firebase Firestore.
- Integrated Supabase for encrypted file storage and protected APIs for uploading and retrieving medical documents.
- Developed an AI-powered report parser using Gemini to extract clinical insights, symptoms, and risk markers from uploaded reports.

AI-Powered Invoice Data Automation System (In Progress) | *Mistral OCR, Gemini AI, GCP* Jun 2025 – Present

- Engineering an automated invoice-processing pipeline targeting a 90% reduction in manual data entry for SMEs.
- Developing an OCR + LLM workflow to extract line items, taxes, totals, and vendor metadata with high accuracy.
- Building reconciliation logic integrated with Zoho and AlignBook APIs to auto-update ledgers and flag discrepancies.
- Implementing scalable orchestration using webhooks and retry/error-handling logic to ensure reliability in production.

MUJ Eats – WhatsApp-Based Food Ordering System | *n8n, WhatsApp Cloud API, Google Cloud* Jul 2025

- Developed a WhatsApp chatbot enabling hostel students to place food orders with automated order confirmation and real-time status updates.
- Implemented vendor routing and automated notifications, reducing manual coordination workload by 80%.
- Built a serverless backend using Google Cloud Functions and n8n workflows to support high-volume order processing.

Aman Star – Full-Stack E-Commerce Platform | *React, Vite, Node.js, MongoDB, Render* Jun 2025

- Created a production-ready e-commerce website for an IT firm with WhatsApp-based order initiation and automated customer communication.
- Developed a feature-rich product management dashboard (CRUD, categories, availability) using React and MongoDB.
- Improved site performance and reduced load times by 40% through component optimization and caching strategies.
- Deployed on Render with CI/CD pipelines, ensuring high availability and scalable infrastructure.

Experience

Tenary – AI Automation Startup May 2025 – Present

Founder & Automation Engineer

- Founded an AI automation startup delivering chatbots, data-extraction systems, and workflow automation solutions for SMEs.
- Engineered end-to-end automation pipelines using n8n, LLM APIs (Gemini, Mistral), and custom integrations, reducing manual effort for clients by up to 70%.
- Led product development, client acquisition, and technical strategy, ensuring rapid iteration and scalable deployment.
- Created reusable automation templates for accounting, CRM updates, invoice parsing, and WhatsApp-based workflows to accelerate client onboarding.

CampusHub – Student Community Platform Feb 2025 – Present

Full-Stack Developer & Product Designer

- Developing a unified student platform for event registration, club management, and academic resources used across campus communities.
- Implemented full-stack features including authentication, protected routes, role-based access, and real-time dashboards using Firebase Auth & Firestore.
- Designed data models and backend APIs to support event publishing, user profiles, and secure document storage.
- Created a comprehensive design system in Figma emphasizing accessibility, reusable components, and mobile-first UX.
- Collaborating with a cross-functional team to refine product roadmaps, enhance performance, and deliver feature updates on schedule.

AmanStar IT Jun 2025

Frontend Engineer & UI/UX Designer

- Developed and deployed a production-grade e-commerce platform using React (Vite), TypeScript, and MongoDB.
- Designed intuitive UI/UX flows and optimized navigation, resulting in a 40% improvement in user task efficiency.
- Integrated WhatsApp-based order initiation to streamline customer communication and reduce friction in the sales pipeline.

Certifications

Machine Learning	NPTEL (Top 2% Performer)
Computer Network Essentials	Cisco NetAcad
Database Programming with SQL	Oracle
Data Structures and Algorithms	CodeChef
Python Essentials	Cisco NetAcad
Business Strategy (Ongoing)	Coursera
